DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title:

The title has been changed to "Substrate for liquid crystal display having multiple terminals connected to semiconductor chip, and liquid crystal display having the same".

(This merely corrects a typographical error.)

End of examiner's amendment.

Drawings

2. The drawings were received on 18 July 2005. These drawings are approved by the examiner.

Allowable Subject Matter

3. Claims 1-3 and 5 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art [*Yoshino*, for example] discloses first bus lines and second bus lines, and first terminal sections as recited. It also discloses [see Fig. 9 of *Yoshino*, for example] second terminal sections connected to another terminal of the semiconductor chip, and a third terminal section electrically connected to the second terminal section, provided at an end of the substrate, to which signals are input from the outside. The prior art also teaches [*Lee et al.*, U.S. Patent No. 6,587,160, for example] a connection wiring, and common wiring provided in a location that is removed during chamfering. The prior art does not disclose or fairly suggest that the second terminal section is formed of the same material as that of the other of the first and second bus lines. The examiner understands "same material" to refer to being formed of a material deposited in a layer which is then patterned to make both the bus lines and the second terminal; it does not mean merely that both are made of chromium, say. The prior art also discloses [*Kim et al.*, U.S. Patent No. 6,204,081] first and second bus lines [160, 170] and first and second terminals [160b, 170c] which are made of the same material as the bus lines but are not both connected to a single semiconductor chip – the terminals are on different edges of the display rather than next to each other. Claim 1 is therefore allowed, as are dependent claims 2, 3, and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Schechter whose telephone number is (571) 272-2302. The examiner can normally be reached on Monday - Friday, 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
